WARNINGS AND PRECAUTIONS

- Refer to the instruction leaflet about indications and contra-indications and technical specifications of the product.

IMKJAZ[®]FLA416040BB

Jazz[™]
Lock

Posterior fixation system
of the Spine

JazzTM Lock

INDICATIONS

- ❖ Unique sterile implant
- ❖ Self-locking connector
- ❖ Polyester Band based on the Jazz platform = proven concept

- ❖ **Bone / implant interface:** the band adapts and surrounds the anatomical structures
- ❖ **Simple and fast implementation**
- ❖ **Optimized instrumentation:** only 4 instruments with 3 from the Jazz platform
- ❖ **Unique tensioning instrument**

Jazz Lock is a temporary implant to be used in orthopedic surgery. Jazz Lock is a bony anchor designed to provide temporary stabilization of the spine for bony fusion or consolidation of a fracture. Jazz Lock is designed for a posterior approach.

The indications for use include the following applications:

- Spinal trauma surgery, used in sublamina, interspinous or facet wiring techniques;
- Spinal reconstructive surgery, incorporated into constructs for the purpose of correction of spinal deformities such as scoliosis, kyphosis and spondylolisthesis;
- Spinal degenerative surgery, used as an adjunct to spinal fusions.

- ❖ **Short learning curve** thanks to simple implant, instrumentation and technique

- ❖ **No metal in the canal = no artifact**
