TRAN-C[®]

Expandable PLIF PEEK Cage

Distribuidor exclusivo em Portugal:

 **SeohanCare**
Leader of Implant

TRAN-C®

Expandable PLIF PEEK Cage

Features and Benefits

Sharp surface of the implant ensure primary stability and prevent migration of the cage
No need bone grafting after implantation
Expanding slide bar is made out of titanium which provides high solidity
Bullet-shaped angled tip aids in distraction and insertion
Large graft windows and slide bar maximize fusion potential which accommodates autogenous bone graft or bone graft substitute to allow fusion to occur through the cage
Anatomically contoured teeth to resist implant migration
Composed of PEEK-OPTIMA®, a material with a proven clinical history that provides structural strength

Indications

Degenerative diseases
Deformities and scoliosis
Fractures with anterior support
Osteoporosis
Instability

Contraindications

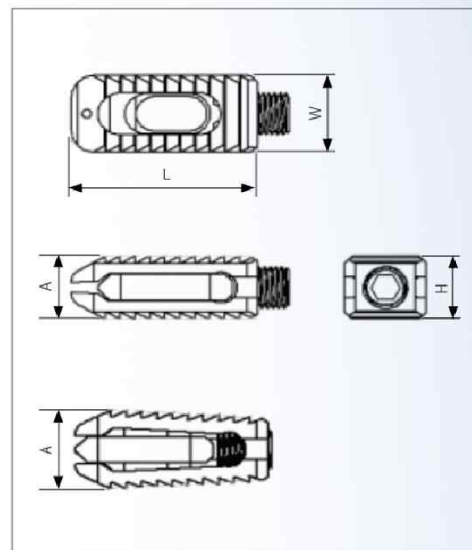

Destructive tumours
Unstable burst fractures & compression fractures
Spondylolisthesis Acute infections
Extensive peridural scarring
Involvement of 3 or more levels
Severe osteoporosis
